

Color Me! A Flag for Planet Earth

© Peter Kokh, 1990, Lunar Reclamation Soc., Milwaukee, WI

The **SHAPE** above is the characteristic “Orange Peel” World Map Projection that allows for the way the Continental land masses are distributed: Left Lobe: North & South America - Top Right Bulge: Europe & Asia - Middle Bottom Lobe: Africa - Left Bottom Lobe: Australia. The telltale shape says that *this is Earth*, not just any Earthlike planet.

The **COLORS** are those of *Earth as seen from space*: **WHITE**: the polar caps & clouds
BLUE: the oceans - **TAN**: the deserts - **GREEN**: the forests, grasslands, and jungles.
