

MARS Frontier Settlement Flag

- Based on the astronomical symbol for the planet Mars - ♂
- The idea is to color symbolic zones of the "globe" portion with the natural "reddish hues" of Mars: light salmon (2), orange (3), and rusty ocher (4), plus white for the water-ice of the two polar caps (1).
- To the Arrow which points to Mars' Sunny (7 yellow) Future, We add the colors that Human Settlers will bring: Blue for Water (6), and Green for Vegetation (7)
