A PETITION: "TO THE MOON TO STAY"

We, the undersigned, believing **the Moon** to be a priceless and integral part of the Earth's natural endowment, so petition **our government**, in cooperation with other governments and **free enterprise**, to make the capital investment necessary to establish **self-supporting settlements** on the Moon, to tap its mineral wealth to supply all the **environmentally clean energy** that Earth will need **to support all** its population, **decently.**
